INTRODUCTION

BTCINU IS HERE TO CHANGE THE WORLD OF MEMECOINS FOR GOOD!

This is the modern solution to make gains with Memecoins fast and easy. After a long and intensive research, the team is determined that BTCINU is able to combine BTC and SHIB into one concentrated MEMECOIN with ENORMOUS POTENTIAL!

Thanks to the high level of awareness and acceptance of Bitcoin and the massive flood of new Memecoin investors through Shiba Inu, BTCINU can combine the strenghts of both predecessors and ATTRACT new investors.

IMPRESSIVE BTCINU FEATURES:

- 1. EASY ACCESS WORLDWIDE:** Anyone in this world can buy the Memecoin easy and fast during the Presale
- 2. INSTANT GAINS:** The Presale prices are much lower than the launch price. Early Presale investors have assured profits at launch date.
- 3. INCREDIBLE MARKETING OPPORTUNITIES:** Since the team combines BTC and SHIB nothing stands in the way of the marketing campaign and all kinds of investors will be approached.
- 4. NO LIMITS:** Since the Presale is hardcapped to an extremely low MarketCap, there is a huge growth potential in BTCINU after launch.

And that's why... ***"BTCINU HAS THE POTENTIAL TO RISE TO IMMEASURABLE HEIGHTS!"***

TOKENOMICS

The Tokenomics of BTCINU are made to be perfect. Thus, we aim to achieve the maximum potential for excessive growth over time.

1% TEAM

20% CEX & DEX
LIQUIDITY

10% MARKETING

69% PRESALE

The total supply of the token is exactly 21 million (21.000.000) and the initial exchange offering price will be 0.06 \$. Which sets a fully diluted market cap at launch of 1.260.000 \$. Thanks to years of experience of our analysts, we expect a healthy price increase in the coming years. Since the market cap is deliberately kept very small, enormous gains in the coming bull run cannot be ruled out but are very likely.

The presale is divided into nine separate stages. With each stage there is a price increase. Throughout the entire presale phase the token will be offered at a discount which provides secure profits for early investors at launch date.

Computer hackers or other malicious groups or organisations may attempt to interfere with the BTCINU platform in a number of different ways – these may include malware attacks, distributed denial of service attacks and consensus-based exploits such as a 51% attack that could result in the loss of BTCINU tokens or the loss of the ability to access BTCINU tokens.

The regulatory status of crypto assets remains in flux and varies from jurisdiction to jurisdiction, presenting owners of crypto assets with a level of legal uncertainty. It is possible that in the future, certain laws, regulations, policies or rules relating to crypto assets, blockchain technology or decentralized applications may be implemented that affect or restrict token holders' acquisition, ownership rights, and ability to buy, sell, convert or use crypto assets. Uncertainties regarding tax legislation relating to crypto assets could leave token holders exposed to unforeseen consequences such as taxable events retrospectively applied or to be applied in the future. Each prospective BTCINU purchaser should weigh up their own individual appetite for risk and consider consulting an independent financial adviser before making any decisions. Readers of this whitepaper may also need to consult a tax professional, accountant, lawyer or other professionals in order to fully satisfy themselves regarding any outstanding matters related to how the BTCINU platform is designed and operated, before deciding whether a purchase of BTCINU tokens would be in line with their risk profile.
